

AGD Solutions LLC

Website Requirements & Content Brief

Project Objective

The objective of the website is to position AGD Solutions as a trusted healthcare practice consulting partner for independent physicians and specialty groups. The website should communicate our expertise, establish credibility, generate qualified leads, and clearly showcase the services we provide to help practices become more organized, profitable, and sustainable.

Target Audience

Primary Audience

- Private independent physician practices
- Single-provider and multi-provider medical groups
- Primary care practices
- Internal medicine practices
- Specialty practices (cardiology, orthopedics, geriatrics, behavioral health, etc.)

Secondary Audience

- Physicians preparing to launch a new practice
 - Practices requiring operational turnaround support
 - Medical groups seeking revenue expansion opportunities
 - Practice owners preparing for sale or ownership transition
-

About Us

Company Overview

AGD Solutions is a healthcare practice consulting firm dedicated to helping private independent physicians and specialty groups build clinics that are structured, profitable, and sustainable.

Led by Founder and Principal Consultant **Diana Di Masi**, AGD Solutions focuses on the real engine of a practice: operations, processes, people, and revenue, allowing clinicians to concentrate on patient care rather than daily operational challenges.

From startup practices to mature organizations requiring turnaround support, AGD Solutions brings disciplined structure to every aspect of practice management, including:

- Front office workflows
 - Procedure and policy manuals
 - Ancillary service development
 - Marketing strategy
 - Revenue optimization
 - Financial controls
-

Mission

The mission of AGD Solutions is to transform independent medical practices into well-run, high-performing businesses that deliver excellent patient care, predictable revenue, and a manageable workload for clinicians and staff.

AGD Solutions accomplishes this by designing efficient operations, building comprehensive procedure manuals, identifying revenue opportunities, and strengthening the operational and financial foundations necessary for long-term success.

Vision

AGD Solutions envisions a future where independent medical practices are thriving businesses capable of competing successfully with large healthcare systems while maintaining their autonomy, identity, and patient relationships.

The firm strives to become the preferred consulting partner for practices seeking operational excellence, financial stability, and sustainable growth.

Core Values

Structure Before Stress

Well-designed operations prevent problems before they occur. We build documented workflows that create consistency and accountability.

Clinician-Centered Solutions

All recommendations are practical, realistic, and tailored to the goals and operating style of each physician or provider group.

Financial Integrity and Safeguards

Strong controls and transparency protect practices from revenue leakage, fraud risks, and operational inefficiencies.

Straightforward, No-Nonsense Guidance

Clients receive clear, actionable recommendations that simplify decision-making and accelerate implementation.

Long-Term Sustainability

Every engagement is designed to leave the practice stronger, more independent, and equipped for future growth.

Leadership & Experience

Diana Di Masi

Founder & Principal Consultant

Diana Di Masi brings more than 20 years of experience supporting medical practices across multiple specialties.

Areas of expertise include:

- Practice startup development
- Clinical operations
- Revenue cycle management
- Staff training and development
- Ancillary service implementation
- Practice optimization
- Turnaround management
- Fraud and embezzlement risk prevention

Clients value her ability to combine operational discipline, financial oversight, and practical healthcare business experience to achieve measurable results.

Commitment to Healthcare Operational Excellence

For AGD Solutions, operational excellence means creating practices that are:

Organized

Core processes are standardized, documented, and consistently executed.

Measurable

Key performance indicators are tracked and regularly reviewed.

Profitable and Protected

Revenue is actively managed while internal controls safeguard the business.

Transferable

Operations are structured to support growth, ownership transitions, partnerships, and eventual sale opportunities.

4. How AGD Solutions Works

Step 1

Initial discovery consultation focused on goals, challenges, and opportunities.

Step 2

On-site or virtual assessment of operations, finances, workflows, and team structure.

Step 3

Delivery of clear recommendations and a prioritized action plan.

Step 4

Implementation support, staff training, and follow-up as needed.
